

# Akamai University

Dedicated to improving human and planetary health

## Akamai University Press Release 2022

Open Letter to the Akamai University Community. Akamai University has proudly sustained operations for more than 20 years as a nonprofit nongovernmental organization operating in good standing as a degree granting institution from the State of Hawaii in the United States of America.

As a viable institution, Akamai is dedicated to the betterment of the human condition and sustainability of the planet. The University operates as an online graduate school by distance education, cross-border seminars, one-on-one mentorship and at time on location in various countries in person meetings.

More than 95% of the Akamai University faculty team hold accredited doctoral level credentials, are well written and instruct classes at Akamai as well as other accredited universities in the USA and worldwide.

Our University affiliations included over the years accredited and governmental universities across 17 nations in addition to the USA. Degree programs are based in the academic pursuit using fundamental theories, principles and practices that undergird the degree field and are essential for the preparation of career professionals in the field under study.

Akamai has had Premier University status with Accreditation Service for International schools, Colleges and Universities (ASIC) headquartered in London, UK. ASIC are members of American based CHEA. AU's governing board is pursuing additional USA accreditation as well as our international accreditation focus to meet the local challenges for licensure.

The ASIC quality assurance summary report dated 07 February 2018 awarded Akamai Premier status based upon high level scores for premises and health and safety, management, and staff resources, learning and teaching, course delivery, quality assurance and enhancement, and marketing and recruitment

All students undertake guided independent study and research under the guidance of quality academic faculty. Akamai University is dedicated to the betterment of the human condition and sustainability of the planet. It is the position of the University that institutional affiliations worldwide are desired and necessary to successfully reach this mission and pursue the amelioration of major world problems.

The following standards, policies and procedures and general guidelines have been established by the Akamai Board of Management to assure academic quality and integrity across all educational partnerships established by the University.

Our degree programs are derived in service to our vision, mission, goals, and objectives as a graduate university, namely betterment of the human condition and sustainability go the planet including new focus on universal equality.

Our graduate students pursue quality research studies under the careful oversight of a special appointed quality assurance Committee.

The University operates four quality research and community building focused journals.
