

# Akamai University

Dedicated to improving human and planetary health

## BSc in Complementary Integrative Health (BSc–CIH) Concentration: BioEnergetic Wellness (BioEW)

Offered through [Akamai University](#) who has active International Accredited by the [Accreditation Service for International Schools, Colleges and Universities \(ASIC\)\\*](#)

### **Mission:**

The BSc-CHI degree, concentration in BioEW offered through the College of Integrative Health, addresses body, emotion, mind and spiritual aspects of life in a 4-year Bachelor of Science degree through an online group class setting. It reaches beyond certificates in Therapeutic Touch (TT), Touch for Health, (TFH), Brain Gym (BG), Natural BioEnergetics (NB), Transform Your Life (TYL) and other energy modalities.

This degree can also be used for those seeking to increase their knowledge and skills in BioEW.

### **Goal:**

The degree provides a solid foundation in scientific knowledge, techniques and skills. The course work can also be used for those with advanced degrees seeking to increase this knowledge and skill in BioEW modalities as well as using the BSc-CHI, BioEW for further studies such as pursuing a MSc or a PhD. in BioEnergetic Wellness.

### **Vision:**

The BSc-CHI, BioEW degree is a foundational academic degree that qualifies the graduate to:

- Become a practitioner in their chosen modalities such as: TT, TFH, BG, NB, TYL or other complementary integrative health training.
- Become eligible to start a Master in BioEnergetic Wellness to become Advanced Practitioner, Educator, or Coach.
- Design your own wellness center or private practice as well as pursuit of local licensure to practice in a hospital, a clinic, or an established health care facility locally.

### **Objectives:**

The objectives of the B.Sc.in CIH, BioEW are to prepare students to:

1. Practice chosen modalities (e.g., TFH, NB, TYL) while understanding the basis of other modalities and being proficient in at least a second one (e.g., BG, TT, Biophonics).
2. Explore energy therapies' impact on individuals growth, change and well-being, combining foundational science with specialized studies in BioEW.
3. Develop a comprehensive understanding of the dynamic relationship between biophysical processes and electro-magnetic waves on the well-being of humans, plants and animals..

4. Integrate energy work into self-care for both students and clients personal and professional life. This can include topics such as psychology, intentionality, spirituality, awareness, intuition, ethics, religions, and more.
5. Explore scientific basis of electro-magnetic wave's practices using various scientific methods that fit your research questions, providing solid explanations for causation in BioEW including the study of semantics and biophotonics, that addresses the Science of Light.
6. Conduct from the following list: short scientific experiments, write concise scientific reports or papers, presenting them orally, conduct podcasts or other appropriate channels to spread the word of the contributions of BioEW.
7. Become academically prepared to advance from the BSc – CIH in BioEW graduate degree if you choose later to pursue a Master and / or Ph.D. This degree lays a foundation that is solid to build on if you so desire advance your career further.

The academic base of Akamai University is solid and recognized internationally for its quality and academic rigor setting the stage to integrate bioenergy practices into healthcare, research, and wellness industries, preparing graduates for holistic health and wellness care, complementary and alternative medicine, creating innovative bioenergy solutions to world problems impacting all of us.

*\*For your information, [Akamai University](#) is in active pursuit for USA, [National Higher Learning Commission \(HLC\)](#) accreditation which is about a 3 year process.*

## Pre-registration, Timing & Fees

- ❖ Courses will start on September 1st, 2025 and end before Christmas week. The second semester starts early February 2026 and ends in May. Group online courses will be offered approximately between 11 am EST and 2 pm EST, allowing for part-time work.
- ❖ Students will need to preregister and have a brief interview with a faculty member selected by the BioEW Program Director to make sure this program is the right fit. A few part-time students will be permitted. Visit the website below for program course details.
- ❖ Non-Refundable Application Fee is \$250 includes online interview with application study plan completed.
- ❖ The program is a four years with two semesters per year and has 30 minimum credits per semesters X 4 = 120. Finishing Activities are required for all modalities the last semester.
- ❖ Program Cost: \$10,000 US tuition per year x 4 years = \$40,000.
- ❖ Part time student per course fee is \$430)
