

Multi-Dimensional Healing Ethical Practice and Teaching: Why Now & Why Us?

Mary Jo Bulbrook, RN, BSN, MEd, EdD, CEMP/S/I, HTCP, HTP/I

The widespread experience of multi-dimensional consciousness has opened the door to revisit the dynamics regarding ethical practice and teaching in the industry of Consciousness Studies including Near-Death Experiences, Near Dying Awareness, Out of Body Experiences, Past Life Regression, Shared Destiny, PSI Phenomena, Mediumship, Poltergeist, Soul Healing and more.

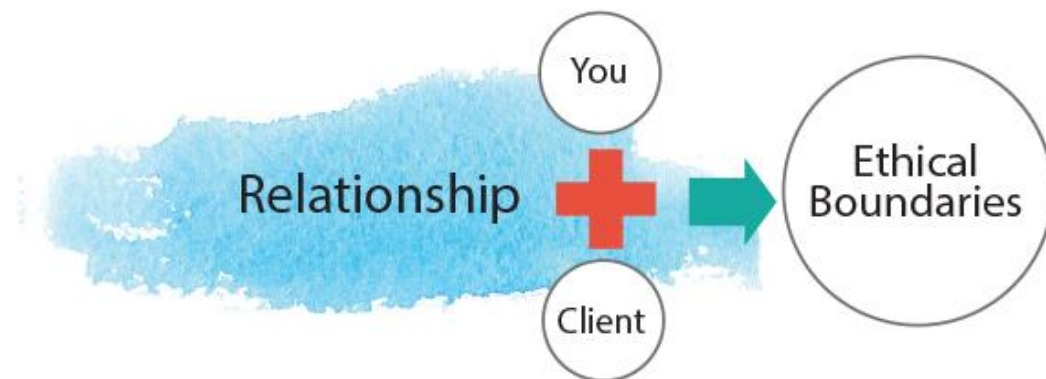

My goal is share what is taking place in the larger context of this practitioner / teacher industry affecting health care practice and delivery including addressing ethical practice and teaching.

Why now and why us, speaks to the urgency felt throughout this nation and beyond to address this growing and diverse unregulated industry. Reports of abuse, inadequacy in handling difficult challenges is getting our attention now. We, those of us who practice and teach multi-dimensionally, need to provide leadership within, rather than regulations being imposed upon from without.

Goals include:

1. Provide support for clients, practitioners, and teachers to interact and communicate effectively together hearing each other from a heart space connection.
2. Examine and understand the unique demands required to act ethically when multi-dimensionality is used.
3. Create safety measures for the public and guidelines for professionals.

Lawmakers are poised and may act in inappropriate directions influenced by others with vested interest that can control this growing industry and hamper progress needed to ensure empowerment including safety of the client and safeguard free choice and access to health care at a reasonable cost.

Practitioners, teachers and organizations also need to be safeguarded, which requires we operate with integrity following adequate, clear guidelines that become standards for the industry.

Here is an overview ethical commitment example created to hold high integrity to guide action in clinical and educational services as well as for organizational behavior.

Ten Ethical Commitments for Practice – Education - Organizations

GOLD STANDARDS OF SERVICE

1. SUPPORT AND EMPOWER OTHERS AS HEART CENTERED COLLABORATORS.
2. OPERATE WITH HIGHEST STANDARDS OF CARE, RELATIONSHIP AND ETHICS.
3. SERVE EQUALLY REGARDLESS OF RACE, AGE, NATIONALITY, SEX, RELIGIOUS AFFILIATION, SEXUAL ORIENTATION, STATUS OR SITUATION.
4. SUPPORT THE CLIENT'S BEST INTERESTS IN ANY AND ALL DECISIONS.
5. SPEAK THE TRUTH IN ALL COMMUNICATIONS.
6. BE TRANSPARENT IN PROVIDING SERVICE WITHOUT CONFLICT OF INTEREST.
7. ALWAYS MAINTAIN HEALTHY BOUNDARIES.
8. WORK IN PARTNERSHIP WITH THOSE SERVED.
9. ASK PERMISSION AND DESCRIBE CHARGES BEFORE PROVIDING SERVICE.
10. DOCUMENT CLINICAL SERVICES AS REQUIRED BY TRAINING, LAWS AND LICENSE.

[Institute for CAM Studies at Akamai University](#)

This gold standards model of service is based on the [World Health Organization Technical Brief No. 1, 2008. Making health systems work.](#) "The management and delivery of health services so that clients receive a continuum of preventive and curative services, according to their needs over time and across different levels of the health system."

Key organizations in the industry such as the newly created www.NAOEP.org are in process creating relevant high standards of professional performance to find a pathway to licensure in the USA to show what needs to happen to ensure safety and efficacy to deal with this expanding field of consciousness and multi-dimensionality applied to health care practice.

The health care system needs new partnerships, collaborations and revolutionary approaches to provide much needed reform and rejuvenation in health care delivery.

The veil has become thinner between levels of consciousness including time and space non-local communication of multidimensionality. Many are ill-equipped to navigate the changes legally and professionally. Once you open to other realms there is no turning back as both the beauty and intrigue captures the imagination for wanting more, sooner rather than later.

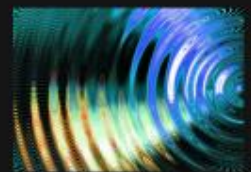

This practical guide will cover some multi-dimensions of consciousness explored and navigated with clients over my 50 + year practice and teaching in multiple countries as well as organizational leadership roles I served throughout my career. I learned multi-dimensional healing and consciousness as I lived it walking as a health care professional and educator in traditional and nontraditional arenas in multiple countries. I witnessed and opened the door to sensations and theory that out reached current health care practice and teaching including ethical guidelines and licensure. I needed to find answers quickly – hence the evolution for new solutions flooded my consciousness as I accepted the challenge to explore unknown territory and not be afraid to integrate and provide service from this new platform of unity of consciousness and multidimensionality applied to health care and health professions with opportunities to include gifted awakened others to serve.

Walk this path with me. I will lead you through new territory I will be sharing regarding multi-dimensional healing ethical practice and teaching. This includes cutting edge advances in extraordinary experiences of care and comfort to individuals of all ages, populations in different home and health care settings. A one size fits all approach does not work.

As a past member (2017-2018) of an international consortium of expert practitioners, educators and researchers actively working on preparing exemplar ethical criteria, I will be sharing my latest thinking influenced by those collaborations of what is before us and how to ride the wave successfully. This is not for the timid soul, rather the experience will offer firsthand theoretical knowledge and experience shaped my multi-dimensionally evolution hoping to inspire you to find your unique evolutionary path that will lead to service.

Multi-Dimensional Healing - Ethical
Practice & Teaching
Bulbrook, ASCSI Oct. 6. 2018

How is Multi-Dimensional Healing Different?

Traditional Clinical Care

- Practitioner focus of the care
- May or may not be holistic
- Focus on alleviating symptom(s)
- May or may not go back in time to look at early programming or trauma
- Rarely includes multi-dimensional healing

Then embrace another way of providing service as exemplified in the following through multi-dimensional healing through Energy Medicine Partnerships:

Multi-Dimensional Healing

- ✓ Symptom or concern
- ✓ Origin
- ✓ Multi-sensory data explored as contributing factors
- ✓ Explore belief holding symptoms in place
- ✓ Childhood trauma
- ✓ Karma
- ✓ Interrelationships
- ✓ Use of intuitive data
- ✓ Explore other lifetimes

Multi-Dimensional Healing - Ethical
Practice & Teaching
Bulbrook, ASCSI Oct. 6. 2018

As an example, how to understand how energy healing transmissions work look at this.

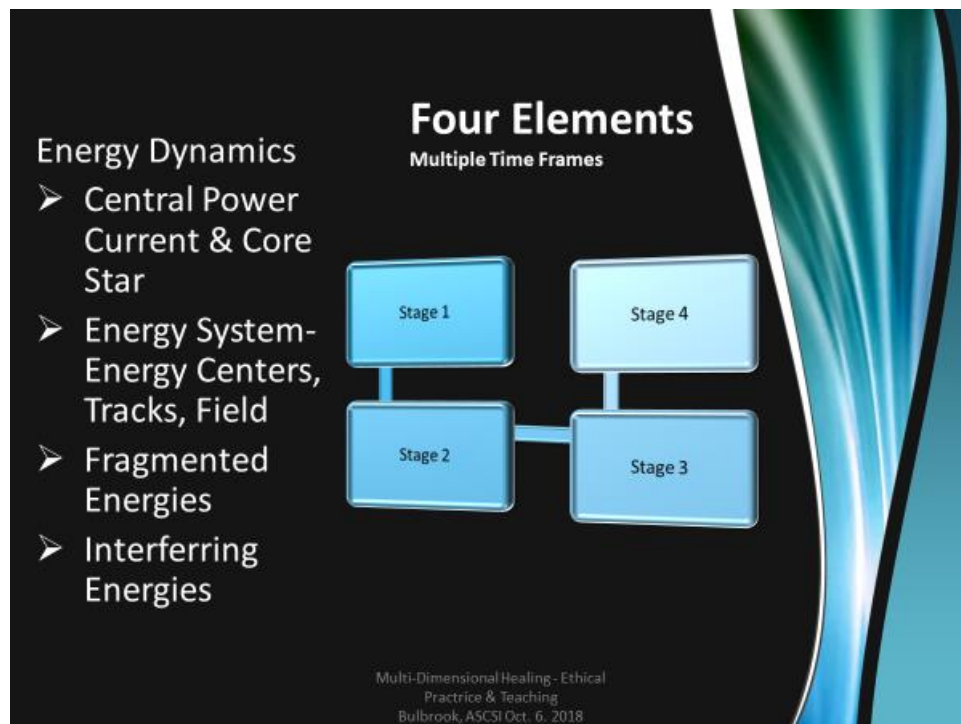

Lines of connection & energy distribution

- Transmission line deliver electricity from power plants to substations
- Substations adjust voltage to lower levels to main distribution lines
- Main distribution line to large subdivisions and commercial to local distribution lines
- Local distribution lines to tap lines deliver electricity to smaller neighborhoods and businesses to distribution transformers
- Distribution transformers to service lines deliver electricity to individual home or business

Multi-Dimensional Healing - Ethical Practice & Teaching
Bulbrook, ASCSI Oct. 6, 2018

**Dr. MJ Bulbrook, Multi-Dimensional Healing: Ethical Practice & Teaching:
Why Now – Why Us?** Presentation ASCSI Oct. 2018

The important aspects for this paper is focusing on the Central Power Current of our lives and the Core Store as shown in the below illustrations. Multi-dimensionality travels from the Central Power current to the house of our physical body and consequently our life and gives us the bandwidth to operate on Earth plane. This circuitry is developed through meditation, and other inner states of consciousness including energy therapies of which there are a range to choose from will develop at the rate ones' soul chooses and can handle.

**Core Star from
Divine Source**

Travels through Central Power Current.
Radiates throughout our being and
beyond. Serves to share our Divine Essence
with others.

This is how we are made in the image and
likeness of the Divine as we all have Divine
Essence in us if we choose to represent
that aspect of our creation.

Central
Power
Current
Energy
delivered to
human
body

Divine Source to individual Soul Star

Soul Star is the central power current through the human body that is the energy needed to fuel all aspects of our being that connects to the Earth Star. Between these two stations regulate the flow throughout our being

From Earth Star we are connected to the center of the earth that ties us here this lifetime.

When we leave physical earth, we detach from the center of the earth and our individual Earth Star and the energy goes back to the Soul Star.

Multi-Dimensional Healing - Ethical Practice & Teaching
Bulbrook, ASCSI Oct. 6, 2018

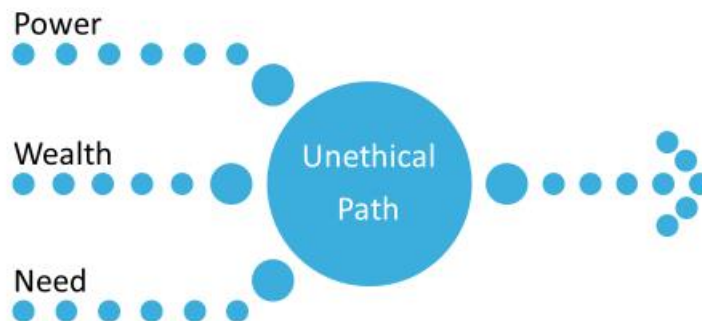

Why do some choose a path that is self-serving or unethical?

And what do we need to do about it – Why Now and Why Us?

Question to be addressed.

There are three forces basically that confront the choice.

Why do some choose an unethical path?

Multi-Dimensional Healing - Ethical
Practice & Teaching
Bulbrook, ASCSI Oct. 6, 2018

Challenges Hindering Ethical Practice / Teaching

Earthly Plane

- Lack of Pure Intent
- Need to Control Others
- Be in Charge
- Lack of Knowledge
- Unclear Boundaries
- Conflict of Interest
- Soul Not in their Body

Multi-Dimensional

- ✓ Interfering Energy – attachments and no clear signal
- ✓ Karmic patterns – other lifetimes
- ✓ Spirit attachments – full or partial
- ✓ Fragmented energies – split off

Multi-Dimensional Healing - Ethical
Practice & Teaching
Bulbrook, ASCSI Oct. 6, 2018

It is from the empowered heart center that we move to live multi-dimensionally in relationship to others sharing and caring for each other in an interdependent way in the world rather than a selfish primarily personal gain. Finding ways to open the heart, live in the heart and give from the heart while caring for the self unselfishly but considering our life's path or connectedness is what we are faced with and challenged to endure.

Why Now – Why Us?** Presentation ASCSI Oct. 2018

In the bibliography find ways to open the heart through different avenues. Also find examples of ethical documents from diverse organizations that have studied intently this dynamic and take responsibly to heart-centered leadership in the new direction of how to live, be and function within integrity and collaboration with others.

In this graphic taken from a 2019 course I have prepared for IANDS Sharing Groups On-line (ISGO) is illustrated some of the ethics documents I have included to illustrate what is out

there guiding the way for the future in this industry. They are listed in the bibliography to examine closely.

In Divine Alignment, SQuire Rushnell (2012) author of the bestselling Godwinks Series lays out a framework to evolve to your unique path. As he often comments it is simple experiences that shape our destiny. He quotes the Hertz rent-a car agent advised that any vehicle could be equipped with a GPS navigational devise – called “Never Lost.” He remembered thinking: Wouldn’t it be great if we all had GPS: A Global Positioning System... making sure we are “never lost”? For SQuire, that is when the penny dropped. He thought we do. (Rushnell 2012 p.1)

In summary the steps he outlines uses a **GSP – God’s Positioning System** as the source for guidance and inspiration. For those who do not believe in a God or have a different word for something similar, his steps to follow will still fit. Just focus on the words underlined and come up with what works for you. The steps follow.

GPS STEP 1: SPEAK WITH THE NAVIGATOR

GPS STEP 2: LISTEN TO YOUR INNER COMPASS

GPS STEP 3: MAP YOUR DESTINY

GPS STEP 4: UNSHACKLE YOUR BAGGAGE

GPS STEP 5: STEP OUT IN FAITH AND BELIEVE

GPS STEP 6: READ THE SIGNS, RECALCULATE AND ACCELERATE

GPS STEP 7: GRATEFULLY ARRIVE WITH A FULL WELL WITHIN

[Divine Alignment: SQuire Rushnell 2012](#)

Peter Russell From Science to God: A Physicist’s Journey into the Mystery of Consciousness (Russell, 2005) outlined compelling arguments that start with his opening quote of Alfred North Whitehead... *“More than anything else, the future of civilization depends on the way the two most powerful forces of history, science and religion, settle into relationship with each other.”*

His journey as a scientist at heart and a young atheist, he lays the foundation for his evolutionary path to a believer in something greater than the human being that resulted in his paradigm shift. He quotes other distinguished scientist of his time who made the transition from the world of just science. He quotes Albert Einstein *“Science without religion is lame; religion without science is blind.”* For me Russell hit the nail on the head.

More recently I was personally inspired by a young Asian woman who was interviewed Sept. 11, 2019 and presented on C-Span2 Book TV described her compelling analysis of *“The Art of Logic in an Illogical World”*. Her name is Dr. Eugenia Cheng. She shows math formulas that outlines the interconnection of all things and how to find ways to bring together diverse thinking together. *A key element facing our world today.* What are the values we bring to the table and how do we work together – science and religion, boss and workers, big companies and small, white race with the rest of the world, etc. You get with I am going with this I trust. Her remarkable outlay of math as a vehicle to look at the interconnection of all things to get dialogue started is magical for understanding the world and how it works together or not. She postulated we have broken systems of relationships and turns to math in a unique way to reformulate how to address diverse points of view.

If you stay in the same old house or the same old paradigm of beliefs and current knowledge, you may miss insights that take the evolution of our ideas to the next level.

I turn to the Journal of Medicine and Life published on line 2014 March 25 in J Med Life to quote G Vithoukias and DF Muresanu on the topic *“Conscience and Consciousness: A Definition”*. The meanings of the two terms are often not understood – conscious is *“clear action”* – an ethics of life so to speak while *“consciousness”* a function of the human mind that received and processes information, crystallizes it, stores it and uses it to act on or not ethically. The descriptions are complex and correlate to the *process of information-consciousness-awareness-conscience*. This stands for the integrated system in all human beings to navigate life. The parts act with absolute interdependence. *Consciousness in the context of neurophysiology is “subjective awareness” of an inner life.*

In my life’s work I use the energetic system described earlier in this paper as clinical data from my experience practicing and teaching worldwide using the Energy Centers, Energy Tracts and Energy Field, Central Power Current, Core Star, Fragmented Energies and Interfering Energy formulations to guide my work as a healer and educator shaping consciousness and supporting individuals to find their path and create their destiny becoming empowered with their life choices.

Larry Dossey, MD (Explore, 2019) addressing *“Consilience: Are Science and Religion Compatible?”* He postulates *“there is a fundamental unity that connects seemingly disparate things of the world as noted in historical precursors.* This concept underscores the premise of my convictions as proposed by Dr. Dossey. Consilience in medicine recommends the unity of scientific medicine with secular and spiritual/religious intentions including prayer.

This suggestion is part of my stand of “why now, why us”. We each need to step up with what guides our action and beliefs which includes bridging science and spiritual guidance.

If the answers we seek come to us through nonobjective avenues such as spiritual insights, dreams, reveries, meditation, hunches, or intuitive guesses, rather than by way of logical mathematical equations, elaborate “theories of everything,” or randomized controlled clinical trials, we should be grateful. It is wisdom itself, not how it is displayed or revealed, that counts. (Dossey 2019, p. 251)
