Welcome to Peace, Diplomacy and International Relations!

It is no small aspiration to strive for a world filled with greater peace, balance, cooperation, and the promise of an evolved human fellowship. These are noble foundation stones upon which to establish the fundamentals of sustainable human culture. They are spiritual principles that demand a worthy mission, and although the tasks and goals before us seem immense, they are attainable with adequate understanding of the problems and solutions, and the full commitment and participation of the global community.

Peace, Diplomacy and International Relations provides essential cross-disciplinary studies in diplomacy, international relations, peace, human rights, international political studies, international legal studies, anti-terrorism studies, cultural philosophy, cultural history, political thought, world cultural history, diversity studies, and applied ethics. The program allows students to acquire a deeper understanding of cultural roots and traditions, and how these various customs impact today's global society.

The program provides insights into the various cultural and social changes which humankind has encountered throughout history. It provides insights into various past failures and achievements and participants to champion greater heights of social, cultural, and emotional growth. Students gain insight into ways to avoid mistakes in international affairs by integrating social, political, and economic factors to further the human condition. The program is also provides insight into the political and legal issues relative to intergovernmental and global economics and provides ways to improve cooperation and vital effectiveness across the international community.

Regards,

Seamus Phan, Ph.D.
Program Director

Program Audience

The program is designed for individuals concerned with the public interest with an international perspective. Our students may include human service workers, educators, public administrators, governmental representatives, military officers and those who will serve the international community. It is also appropriate for peace activists, diplomats and community organizers for peace initiatives, economic development, literacy and wellness.
Dissertation Research Options
Doctoral students in Peace, Diplomacy, and International Relations may undertake research in any of the following areas of concentration:

- Peace Studies
- Diplomacy
- International Relations

ENTRY REQUIREMENTS
As prerequisites for acceptance to the Doctor of Public Health by dissertation, participants should have completed the equivalent of a recognized graduate degree in an appropriate field of study, have research training, and have several years of meaningful professional experience. Participants are expected to be proficient in English language skills or provide other assurances of effective language support throughout the program. Participants must have access to a computer, appropriate software, email and Internet, and academic library resources.

DEGREE REQUIREMENTS
Participants pursuing the doctorate degree by research shall complete a seven-phase process (equivalent to 52 credits above the Master's degree in traditional doctoral program) including three doctoral research tutorials, a comprehensive review, and a dissertation project. The doctoral research tutorials are intended to assure the participants have the skills and knowledge to examine the existing scholarly literature, design an effective advanced research study, carry out the project, analyze the data and present the findings in a publishable quality manuscript.

The comprehensive review includes written and oral components that permit faculty to determine if the participant has sufficient preparation to proceed to the research phase of the program. The dissertation process includes preparation of a formal dissertation proposal, completion of the dissertation project, and preparation of the manuscript for review by the doctoral committee review. Participants complete an oral review of dissertation as a conclusion of the degree process.

As a minimum degree requirement, doctoral participants must maintain enrollment at Akamai University for at least one and one-half calendar years. Although a maximum period of six years is allowed to complete the program, most doctoral participants are fully capable of finishing their programs within three years. No transfer credit shall be applied to this degree, as it is based upon a seven-step quality review process.

At each phase of the doctoral process, in order to progress to the next phase, written approval by the University doctoral committee is required. To remain in good standing, participants must demonstrate effective progress toward achieving quality standards at each phase. Upon successful completion of the process, participants are awarded the Doctor of Public Health degree.
THE DEGREE PROCESS

Phase 1: Basic Research Methods
The first tutorial instructs the participant in foundational theories, principles, and practices specific to the proposed dissertation research, thus clarifying the underlying principles and justifications that support the proposed concept for research. As a minimum element of this tutorial, participants must complete suitable courses selected from the appropriate Center research offerings. Participants must pass a quality review examination conducted by the graduate committee, and if deemed essential, complete additional research methodology coursework to satisfy preparation requirements.
RES 641: Research Tutorial - Research Methodology

Phase 2: Literature Review
This second research tutorial is designed to guide the participant in conducting a thorough and effective search of the scholarly literature in relation to a project of research. Participants examine the quality of existing scholarly literature in their field of research and participate in a quality review under the guidance of the doctoral committee.
RES 642: Research Tutorial_ Literature Search

Phase 3: Research Presentation
The third tutorial is intended to guide the participant in understanding the requirements for effective written argument, referencing and citations of the scholarly literature, and presentation of the findings from research and participate in a quality review under the guidance of the doctoral committee.
RES 643: Research Tutorial - Referencing and Presentation

Phase 4: Doctoral Comprehensive Review
Upon satisfactory completion of the doctoral research tutorials, the participant will be authorized to schedule the comprehensive review. The senior member of the doctoral committee will direct the written and oral components of the review. The written portion is open book style with selected essay questions requesting creative responses that reach for the higher levels of understanding. Answers should be drawn from the scholarly literature as well as applications within the professional business environment. Proper referencing of the scholarly literature is expected. The oral component of the review shall be completed by conference between the participant and committee members and is intended to encourage an open discussion of the written essay responses.
EXM 980: Doctoral Comprehensive Examination Syllabus

Phase 5: Dissertation Proposal Process
During this phase of the process, participants prepare a formal proposal related to their concept for research. The proposal is completed under the direction of the doctoral committee and prepared according to published University guidelines, which shall be provided to the participant.
RES 985: Dissertation Proposal Syllabus

Phase 6: Conduct of Dissertation Project
Following approval of the dissertation proposal, participants will begin their research project. The dissertation may take the form of a traditional research project or it may be a major scholarly project of the type appropriate to the discipline. Whichever approach to the dissertation is chosen, the resulting project must demonstrate mastery of a body of
knowledge in the field and represent a meaningful and original contribution to the betterment of the profession. The dissertation project may be conducted by quantitative, qualitative, or participatory action research. The body of the dissertation manuscript should exceed 75 double spaced, typewritten pages and be structured according to a set of approved research and manuscript guidelines provide by the University. Dissertations that take the form of a scholarly project must follow the guidelines provided by the University for such projects.

**RES 990: Dissertation Project Syllabus**

**Phase 7: Oral Review of Dissertation**

Once the participant has prepared the dissertation manuscript, the senior member of the doctoral committee will schedule the formal review process and act to conduct both the formal physical review of the manuscript and oral review of the dissertation project.

Following receipt of the research manuscript, it usually takes the three member doctoral committee four to six weeks to complete the physical review and prepare questions and commentary for later discussion. The oral review is carried out by personal conference and is designed to allow detailed investigation of the underlying review of the literature, the dissertation methodology, and the mechanics of the project, presentation of the findings, and conclusions and recommendations.

One outcome of the dissertation review process is a set of final expectations directing the participant through the remaining tasks for completing the dissertation manuscript. Once the final manuscript is approved, the participant will submit the formal document to an approved bindery and later arrange for the bound dissertation to be shipped to the University headquarters in Hawaii for permanent archival storage. Upon the participant’s completion of the final tasks, and receipt of the needed records and documentation, the University will issue a letter of completion to the participant. It will then make preparation for issuance of the transcript of record and diploma certificate.

**EXM 995: Oral Defense of Dissertation Syllabus**

**DESCRIPTION OF THE DOCTORAL TUTORIALS**

**RES 641: Doctoral Research Tutorial II: Research Methodology (12 credits equivalent)**

The second research tutorial is designed to guide students in building effectiveness in research design, data gathering and presentation of statistics. Students are expected to prepare a draft of their dissertation research methodology for review by the instructor and at least one outside academic. Should the instructor find gaps and inefficiencies in the proposed research methodology, the student may be directed to complete appropriate course modules in research methodologies or directed readings under the instructor’s guidance.

It is possible that the doctoral Committee Chair will require the student to complete formal research preparation coursework, such as:

- RES 500: Survey of Research Methods (3 credits)
- RES 504: Introductory Research Statistics (3 credits)
- RES 506: Advanced Research Statistics (3 credits)
- RES 508: Qualitative Research (3 credits)
RES 510: Participatory Action Research (3 credits)
RES 512: Effective Data Analysis (3 credits)
RES 520: Social Science Research Methods (3 credits)
RES 524: Techniques in Transpersonal Research (3 credits)
RES 526: Biological Illustration (3 credits)
RES 527: Biological Modeling (3 credits)
RES 528: Environmental Science Research Methods (3 credits)
RES 529: Calculus for Environmental Science (3 credits)

RES 642: Doctoral Research Tutorial I: Literature Search (12 credits equivalent)
The first research tutorial is designed to help in expanding the student’s literature search, building competence in scholarly argument and high-level verbal and written skills. This tutorial includes an emphasis in formatting the presentation of the literature review, written argument for research. For this tutorial, students submit an annotated bibliography for mentor approval, and progress to complete the readings in preparation for the literature review of the dissertation. Students prepare a draft of their literature review for evaluation by the instructor and at least one outside academic. Students finalize the literature review for approval and publication in the Akamai Journal for Human Advancement.

It is possible that the Dissertation Committee Chair will require or allow the student to complete formal coursework, such as one of the following, to reinforce the literature review:

- PCE 501: Psychological Elements of Global Citizenship (3 credits)
- PCE 502: Encountering Cultures (3 credits)
- PCE 503: The Art of Diplomacy (3 credits)
- PCE 504: Non-Violent Political Alternatives (3 credits)
- PCE 505: International Relations Theory (3 credits)
- PCE 506: Graduate Field Studies in Peace, Diplomacy and International Studies (3 credits)

RES 643: Doctoral Research Tutorial III: Referencing and Presentation (12 credits equivalent)
The third research tutorial is designed to help students construct proper citations and referencing of the literature and effectiveness in describing the findings and stating the conclusions and recommendations from their study. Students complete a report discussing the methods to be used for citation and referencing of the literature, explaining guidelines for effective presentation of findings, conclusions and recommendations.

Under the guidance of the Committee Chair, students will select an effective publication manual and other resources in support of an effective dissertation. Examples of effective publication manuals include:

DOCTORAL COMMITTEE EXPECTATIONS
Doctoral participants will progress through their programs under the advisement and mentorship of a three-member Doctoral Committee composed of qualified Akamai graduate faculty. The Committee is comprised of a primary, secondary and tertiary mentor, each with a assigned role in directing the doctoral process.

Doctoral participants are expected to work in unity with the same doctoral committee members throughout the entire program. However, participants requiring a change in committee members must submit a formal petition to the University administration to request the change and such petitions must include a special fee. It must be understood that changing the composition of a doctoral committee may result in a readjustment of expectations, as the committee works to incorporate the ideas and advisement of the new committee member. This may also result in extending the completion date of the degree.

The Dissertation Committee

Formation of Dissertation Committee
Doctoral students have a Dissertation Committee of three qualified graduate faculty appointed to oversee and govern the student’s program structure, progress of studies, comprehensive examinations and dissertation project. When possible, at least one of the Committee members should be assigned from the school of record within the Philippines or from another college or university within the Philippines. When necessary, all members of the committee may be assigned by Akamai University or in combination with EDS Advance Academy.

Responsibilities of Dissertation Committee
The responsibilities of the Dissertation Committee, under the leadership of the Committee Chair, are as follows:

- Directing the preparation and approval of the student’s plan for study, clarifying the timeline for study and the assignment of faculty to provide instruction and to assist with the functions of the Dissertation Committee.
- Providing direction regarding the student’s foundational studies, core studies, specialization, and research preparation coursework.
- Providing leadership by integrating appropriate research preparation coursework or assignments within the plan for study, distributing the coursework to appropriate faculty for instruction and advisement.
- Providing leadership for the written and oral components of the student’s comprehensive final examination, in unity with the other Committee members.
- Providing oversight, direction, and mentorship during the conduct of the student’s research project and manuscript preparation, in unity with the other Committee members.
- Providing leadership for the physical and oral reviews of the research manuscript, in unity with the other Committee members.
- Assist the student in making formal changes in the plan study and timeline for completion, by written addendum, as needed to assure effective progress throughout the program of study.
- Providing final approval for the student’s dissertation and overall degree program and cooperate fully in building the appropriate archival records for the University of record.
Doctor of Philosophy
Peace, Diplomacy and International Relations

Doctoral Committee Appointment Schedule

The Committee Chair is appointed immediately following the doctoral student’s registration and continues in charge of the student’s program until final completion is recorded at the school of record. While the secondary and tertiary members of the Dissertation Committee are identified and confirmed at the onset of the program, and listed in the plan of study, they become active later, just prior to the activities for which they are asked to participate.

- The Secondary Committee Member becomes active one month prior to the commencing of the written component of the doctoral student's Final Comprehensive Examination and continues with the student’s program until final completion is recorded at the school of record.
- The Tertiary Committee Member becomes active just prior to the commencing of the formal review of the doctoral student's dissertation proposal and continues with the student’s program until final completion is recorded at the school of record.

Building the Student’s Plan for Study

Immediately following registration, doctoral students begin work with their assigned Committee Chair in structuring their formal plan for study. The process determines and formalizes the elements of the student's doctoral program and the timeline for completion. The plan for study includes the following essential elements:

- The designation of the degree major for the Study Plan
- The identification of the school contacts and contact information for the schools participating in the delivery of the doctoral program.
- Identification of the required array of coursework for each element of the program.
- Identification of the secondary and tertiary members of the Dissertation Committee.
- Appointment and notification of the course module instructors
- Acceptance of transfer courses for the student's program.
- The timeline for completion of the degree program.

These activities require active participation in program planning by the student and may take considerable time to complete the dialogue and exchange of information. Students are strongly advised to discuss in detail the elements in the plan for study including the coursework, the examinations, and elements of research including the manuscript guidelines.

Once all of the decisions have been made concerning the plan for study, the student and Committee Chair sign the formal document. Copies of the document are sent to the University headquarters for entry to the permanent student record. The plan for study is then distributed to the participating schools and becomes the document that determines effective progress toward the degree. When the expectations laid out in the plan for study have been successfully accomplished, the student is recommended for the degree by the Committee Chair. Students are alerted that the University can make no commitment to inclusion of course modules and assignment of instructors to a student program until after the plan for study has been full processed and approved.
CLASS MODULE DESCRIPTIONS

Core Academic Requirements

PCE 501: Organic Psychology of Global Citizenship (Required: 3 credits)
This entrance level, online, sensory-ecology course in practical, nature-connected education, counseling and healing enables you, backyard or backcountry, to master and teach the established therapeutic science of Applied Ecopsychology. Increase personal, social and environmental wellbeing by enabling individual to create beneficial moments that let Earth teach. This restorative thinking skill helps their 53 natural senses reasonably embrace their nurturing origins in the balanced, self-correcting and renewing ways of natural systems within and around us.

PCE 502: Encountering Cultures (3 credits)
This course assists students in learning about "issues of language and culture, domestic cultural diversity, and global cultural diversity."

PCE 503: The Art of Diplomacy (3 credits)
This course provides insight into the role and application of statecraft. To quote Charles Freeman, "statecraft is concerned with the application of the power of the state to other states and peoples. Diplomacy applies this power by persuasive appeals short of war."

PCE 505: International Relations Theory (3 credits)
This subject surveys the principal theoretical perspectives on international relations and explores their relevance to understanding contemporary issues and developments in world politics. Topics focus on the evolution of international thought in the twentieth century by concentrating on the debates and disputes between competing intellectual perspectives in areas such as human rights, sovereignty, international organizations, and the environment.

PCE 506: Graduate Field Study in Peace, Diplomacy & International Studies (3 cr)
The goal of the field study is to investigate core aspects of the discipline within the professional environment through close contact with practitioners and "real world" situations. Student participation should cover a minimum of 50 hours of contact with the subject matter for each credit awarded. The field placement is expected to afford students appropriate practical hands-on experience and in-depth knowledge of their professions. Students complete a daily journal and prepare a scholarly paper summarizing their findings for the field study. Prerequisites: Students must first complete core subjects.

Research Preparation Classes

RES 500: Survey of Research Methods (3 credits)
This course inspects he foundational techniques of scholarly research. Topics explore sources of scholarly research literature, proper methods for evaluating research reports, fundamentals of qualitative and quantitative research methods.

RES 502: Understanding Research Journal Articles (3 credits)
This course empowers students in assessing the effectiveness of research papers from professional journals. Topics investigate the rigor or various research methods, replicability, bias and validity issues, and the appropriateness of statements of findings.
and recommendations from research. Students study effectiveness and problems in collecting, analyzing, and interpreting data from studies and investigate the applicability and generalization of findings and the proper manner of presenting the details of their own research studies.

**RES 504: Introductory Research Statistics (3 credits)**
This course covers the basic statistical concepts, theory and methods in statistical research. Topics include variables, graphs, frequency distributions, measures of central tendency, measures of dispersion, probability theory, binomial, normal and Poisson distributions, statistical sampling theory, and statistical decision theory.

**RES 506: Advanced Research Statistics (3 credits)**
This course covers parametric and nonparametric hypothesis testing. Topics include sampling theory, Chi-square test, least squares regression, correlation theory, non-linear regression, analysis of variance, Student's t-test, and various methods in nonparametric analyses.

**RES 508: Qualitative Research (3 credits)**
This course provides detailed study of qualitative research methods. Topics survey historical and theoretical foundations of qualitative research, explore major qualitative research strategies, and build an understanding of the art and science of collecting, analyzing, and interpreting qualitative information. The course provides background on applied qualitative research, the politics and ethics of qualitative inquiry, and the major paradigms that inform and influence qualitative research.

**RES 510: Participatory Action Research (3 credits)**
This course provides the foundational principles of participatory action research. Topics survey theoretical foundations of action research, the methodology and applications of PAR in contemporary culture. Students assess the rigor and usefulness of participatory action research in addressing major world problems.

**RES 512: Effective Data Analysis (3 credits)**
This course examines modern scientific data analysis including the elements of effectiveness in study design, data gathering, processing of statistics and interpretation of findings.

**RES 520: Social Science Research Methods (3 credits)**
This course examines essential issues in social science research. Topics include assessment of data gathering techniques using selected case studies from journal articles. Students learn to measure attitudes and performance, use tests in data gathering, contrast and compare uses of statistical and qualitative methods, and evaluate focus group research.

**RES 524: Techniques in Transpersonal Research (3 credits)**
This course offers an exploration of qualitative research methods that are specific to studies in the transformative and spiritual dimensions of human experience. Topics investigate ways of knowing such as intuition, direct knowing, emotional and bodily cues, dreaming, and other internal phenomena. Students apply transpersonal methods to the research process, and contrast transpersonal methods to traditional empirical methods.
**RES 526: Biological Illustration (3 credits)**
This course investigates in detail the skills of drawing and painting by hand or camera lucida, photographic methods, video and digital imaging in biological illustration.

**RES 527: Biological Modeling (3 credits)**
This course explores the analytical and quantitative approaches to the study of biological systems. Topics include fitting data to models, dynamics of systems, transects, random sampling, coring, volumetric measurements, tracking and global positioning. This course presents different mathematical and statistical approaches including deterministic, chaotic, stochastic as well as discrete and continuous models.

**RES 528: Environmental Science Research Methods (3 credits)**
The course investigates the application of knowledge and understanding to problems of original research in environmental studies. Topics distinguish and interpret the differences among research paradigms and methods. Students review essential principles of ecological problems and how they are approached, the minimal requirements of experimental design in ecology, trade-offs in ecological experimentation. Students analyze current literature, critique existing research methodologies and studies, develop practical research skills, and formulate approaches to scholarly research, and prepare a scholarly paper.

**RES 529: Calculus for Environmental Science (3 credits)**
This course covers the fundamental topics of derivatives and integrals with emphasis on methods and applications. It is especially directed towards environmental studies in order to provide a valuable and useful device to help solve problem.

**Finishing Activities**

**EXM 980: Comprehensive Examination-Doctoral Students (2 credits)**
This is the traditional comprehensive examination of doctoral students conducted by the graduate committee immediately following completion of the academic coursework and prior to undertaking the dissertation. The examination usually includes both written and oral components and is confined to the programs of studies completed by the student.

**RES 985: Dissertation Proposal (4 credits)**
Participants prepare a formal dissertation research proposal according to publish University policies and guidelines.

**RES 990: Dissertation (8 credits)**
This course governs the conduct of the dissertation project for the Doctoral level student. The dissertation is a major undertaking that is a demonstration of mastery of a field of study and an original contribution to the field usually 150 or more pages in length. The dissertation project may take any of several forms, depending upon the field of study and the expectations of faculty. This may be quantitative or qualitative research, participatory action research. Doctoral students may re-enroll for this course for noncredit, as needed.

**EXM 995: Oral Defense of Dissertation-Doctoral Students (2 credits)**
This examination is an oral defense of the doctoral dissertation conducted by the graduate
committee immediately following their reading of the dissertation manuscript. The process follows guidelines published by the University.
