Human Subjects Research

Research involving a living individual about whom data or biospecimens are obtained/used/studied/analyzed through interaction/intervention, or identifiable, private information is used/studied/analyzed/generated

Examples of human subjects research include:

- Collecting blood
- Conducting a survey
- Changing participants' environment
- Administering medicine Collecting data
- Interviewing
- Administering a psychological test
- Conducting a focus group
- Testing a new educational technique

Included in the NIH application:

Protection of Human Subjects attachment

If funded, grantees will need:

- \checkmark An Institutional Federal-Wide Assurance (FWA) with OHRP
- \checkmark IRB approval or determination of exemption
 - Human Subjects education* even for exemptions

If research meets the criteria for one of the eight categories of activities that are **exempt** from the federal regulations, not all of the above may apply. Some of the exemptions require a limited IRB review (7 and 8, and some designs under 2 and 3).

Exemptions:

 \checkmark

Exemption 1 Conducted in an educational setting involving normal education practices	Exemption 2 Use of educational tests, surveys, interviews, or observations of public behavior	Exemption 3 Use of benign behavioral interventions in adults	Exemption 4 Collection/study of data or specimens if publicly available or recorded such that subjects cannot be identified* *May be identifiable in limited cases. See §46.104(d)(4)(iii) and (iv)
Exemption 5 Public service program research or demonstration projects	Exemption 6 Taste and food quality evaluations	Exemption 7 Storage of identifiable information or biospecimens for secondary research use. Broad consent and limited IRB review are required.	Exemption 8 Secondary research use of identifiable information or biospecimens. Broad consent and limited IRB review are required.
